PROFILE

High-achieving engineering student (Ranked 1st Nationally in High School Exams), specializing in Data Science and Cloud Computing. Deeply passionate about AI development, machine learning, and cloud infrastructure deployment.

SKILLS

- ✓ **Data Science & IA:** Python (Pandas, Scikit-learn, Tensorflow), RAG, LangChain.
- ✓ **Data Engineering & BI:** SQL Server Analysis Service (SSAS), Talend, Power BI.
- ✓ **Cloud & DevOps:** AWS (CloudFormation), Docker, Kubernetes, CI/CD pipelines, Git.
- ✓ **Database:** MySQL, Oracle, SQL Server, MongoDB (NoSQL).
- ✓ **Development:** JavaScript/TypeScript (NodeJS), Java (Spring Boot).

PROFESSIONAL EXPERIENCE

Assistant Engineer | CRAA-Technologie, Bamako (Mali)

July 2025 – August 2025

- **AI Agent Engineering:** Designed, developed, and integrated an AI-powered conversational chatbot leveraging Retrieval-Augmented Generation (RAG) to automate customer support on the company website
- **R&D and Technical Writing:** Authored comprehensive technical documentation on AI Agent architectures and deployment workflows for the engineering team.

Academic & Cultural Officer | ESSIE Board, Oujda (Morocco)

2023 – 2024

- **Project Management:** Headed the organization of major scientific symposiums and cultural days for the Sub-Saharan Engineering Student Association.
- **Leadership:** Coordinated academic integration programs and extracurricular initiatives for incoming international students

PROJETS PHARES

Predictive Credit Risk Analysis (Finance)

[\[Code GitHub\]](#)

- **Goal:** Investigated critical data features driving interest rates on commercial bank loans.
- **Tech:** Python, Scikit-Learn, Statsmodels, Advanced Regression.

Inflammatory Bowel Disease Detection (Computer Vision)

[\[Code GitHub\]](#)

- **Goal:** Built a deep learning workflow to automate medical diagnoses from endoscopic imaging datasets.
- **Tech:** Python (Pytorch & Keras), Deep Learning (utilizing ResNet & ViT), Kaggle, Google Colab.

E-Commerce Backend Architecture

(Private code source – Available on demand)

- **Goal:** Developed high-performance REST API e-commerce platform for high traffic handling.
- **Tech:** Spring Boot (Java), Kubernetes, CI/CD pipelines, AWS.

EDUCATION

- **State Engineer Degree (In Progress)** | **Data Science & Cloud Computing**
National School of Applied Sciences (ENSA) – Oujda, Morocco | **2022 – Present**
- **Scientific Baccalaureate** | **Exact Mathematical Sciences** | **2022**
Distinction: Highest Honors (Mention Très Bien) – **Ranked 1st Nationally in Mali.**

LANGUAGES: French – C1 (Fluent), English – B2 (Professional), Arabe – Basic Knowledge.
